AGRESSO Mobile Services

Corporations and organisations increasingly find themselves challenged by The Mobile Information Society, where the rising tide of information doesn't stop when people are "away from their desks." Organisations need to move fast to keep ahead of the competition and deliver the desired results. AGRESSO Mobile Services empowers the organisation, enabling its employees to stay up to date on what's going on, regardless of time and place. Use AGRESSO Mobile Services to tear down old boundaries and create a competitive advantage!

Time and expenses

Today, timesheet and expense registration is a core pillar in the relationship between a professional service company and its customers. Thus, documentation for time and expenses spent on a project should always be up to date and available. AGRESSO Mobile Services provides the solution for mobile users through online access to AGRESSO Business World. Sources of error and unnecessary use of time is now removed by correct and efficient data entry through the use of mobile devices while on-site. This procedure allows the speed of the company's invoicing to increase significantly, with quicker cash recovery and improved cash flow.

Mobile Self Service

Task list

The task list in AGRESSO Mobile Services offers a simple and user-friendly approach to workflow in a variety of AGRESSO application modules. In order to make users more aware of their outstanding tasks, this "to-do list" will alert them to every job that needs their attention. All the users' work assignments will be pushed proactively towards them, and displayed in one common and easily accessible interface. This helps ensure that vital tasks are completed promptly, satisfying the business needs of individuals and the organisation as a whole.

Email and Calendar

In combination with Nokia Activ Server, AGRESSO Mobile Services provides access to Personal Information Management (PIM) functionality like your email and calendar. Personal effectiveness is improved by making sure that all relevant staff has the latest picture of your availability and 'dead time' can be eliminated while you stay on top of your inbox! Users of mobile devices are allowed access to corporate e-mail systems while on the move, and are provided with a fully featured e-mail client for Wap enabled terminals allowing mobile users to: View e-mail in the inbox and other folders, read e-mail, send e-mail etc. -Supported Calendar functionality

includes: Browse back end calendar, define rules and personalize calendar synchronization settings and automatically receive reservations on a mobile phone calendar.

Quick links

Any internet address that users would like access to can be included in the Quick Links section of AGRASSO Mobile Services. Simply add the URL once and enjoy the power of mobile Internet access.

Mobile Business Services Requisitioning

The ability to perform requisitions while in the field is crucial to support efficient procurement, especially within a decentralised organisation. AGRASSO Mobile Services lets the mobile user enter a requisition regardless of physical location. In addition, it enables checking the status of previous requisitions at any time.

Customer Directory

Updated customer information is vital for mobile users like consultants and sales representatives. They need to act on real time information, which is provided by AGRASSO Mobile Services.

Mobile Information Service News

The News section in AGRASSO Mobile Services gives mobile users the opportunity to stay updated on developments occurring elsewhere in the organisation. When management distribute vital information through the Intranet they can now be certain that it instantly reaches all parts of the company. News can also be entered from the mobile terminal.

Reports

The Report List is the user's personal report organiser within AGRASSO Mobile Services. It alerts the users to every report they have ordered, whether Browser query output or any standard AGRASSO Office report. In addition, Personal Web Views offer mobile users a simple and user-friendly approach to updated key data through graphical

reports. This ensures that they always have access to information to support critical business decisions.

Staff Directory

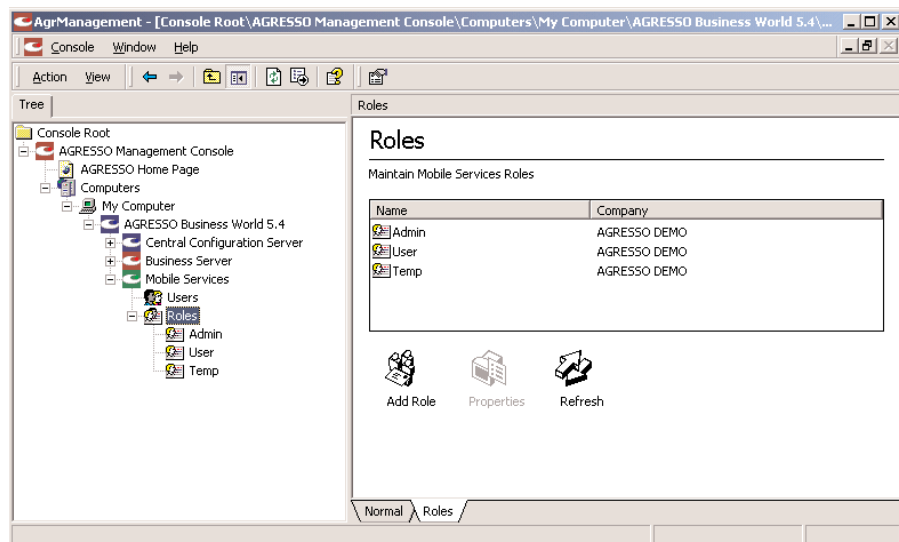

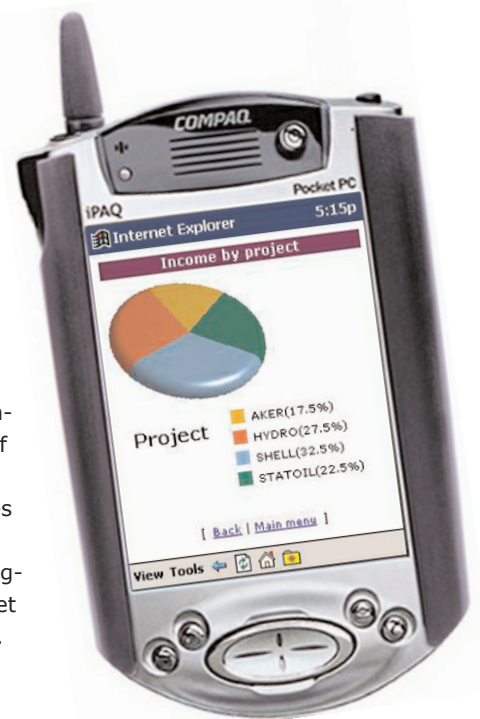

In need of the telephone number or email address of one of your colleagues? No problem with AGRASSO Mobile Services at your disposal, where such information will be at your fingertips whenever you like to get in touch with your colleagues.

Competence

Selecting the right person for a task is crucial for project efficiency. Through the competence section in AGRASSO Mobile Services a project manager can easily search for competence both on a specific resource and for all resources with a particular competence. Thus, the project manager can quickly match up tasks with competence while on the road.

Mobile Core

AGRASSO Mobile Core allows easy set up and maintenance of all mobile users, both through administration from the mobile device and through use of the AGRASSO Management Console. Furthermore, the access control and authentication section ensures secure and correct mobile access to AGRASSO Business World.

Technology

Microsoft Mobile Internet Toolkit (MMIT) was used as the development tool for AGRESSO Mobile Services. MMIT integrates with Visual Studio .NET allowing both rapid development and deployment. The Mobile Internet Designer and full language capabilities through use of C# provided additional benefits when developing AGRESSO Mobile Services. Furthermore, the Mobile Internet Controls Runtime recognizes and adaptively provides appropriate rendering of content for mobile devices. Based on the mobile unit making the call, WML 1.1, HTML 3.2 or cHTML 1.0 will be rendered to the device. Thus, MMIT enables support for a great variety of mobile units in an online scenario. See www.microsoft.com for more information on MMIT.

Nokia Activ Server is the preferred choice to connect the AGRESSO Web Server with the user's Wap-enabled mobile phone. However, Nokia Activ Server is not limited to its role as the Wap gateway. Nokia Activ Office also provides mobile users with access to their email and calendar accounts.

Supported email access protocols:

- Microsoft ® Exchange v. 5.5 and 2000 DCOM & MAPI or IMAP4
- Lotus ® Notes v.4.6 and R5 via IMAP4
- E-mail systems supporting IMAP4 or POP3

The Wap Calendar Agent included in the Nokia Activ calendar notes entries from common scheduling back-end systems to Nokia 6210, 7110, and 9110i mobile phones supporting vCal format or to other mobile phones via SMS.

Supported scheduling systems:

- Microsoft ® Exchange 5.5
- Lotus Notes 4.6 and 5.0

Prerequisites

The following parts of AGRESSO Business World v5.4 must be installed in order to take full advantage of AGRESSO Mobile Services:

- AGRESSO Office
